FROM ORIGINAL APPLICATION TO APPROPRIATE:

Sandy City has for about thirty years served with culianry water a large territory extending from its southern boundary along and to the east and west of State Street a distance of about three miles. This service has been furnished at the request and petition of the residents of said territory, and from time to time during said period of years additional pipelines and service have been extended to accomodate the residents of the area as new homes have been built.

At the present time these service pipelines extend far away from the City's existing sources of supply. These sources produce an excess amount of water beyond the City's needs, and said excess is ample to supply the needs of the above territory. However, on account of the great distance that the water must be transported through the existing lines, the pressure in the outer extremities of the lines is not sufficient to provide the proper service. A pump well located at the point described in this application would be within 2300 feet of one of the main pipelines and would render a very valuable service by applying additional water and pressure to the system.

It is for this purpose that this well is being filed upon, and as the territory is built up with homes the service rendered by it will constantly increase.

The file shows the place of use as: S1/2 SE1/4, S1/2 SW1/4, Sec. 31 T2S R1E, SLBM. NE1/4, N1/2 SE1/4, NE1/4 SW1/4, NW1/4 SW1/4, W1/2 NW1/4, NE1/4 SW1/4, E1/2 NW1/4, Sec. 6, T3S R1E, SLBM.
